Recipe 3.3. Creating a MS binned peak list

Table of contents

1. Problem

We want to bin a MS peak list.

2. Solution

A bin peak list is a kind of compressed peak list defined by intervals of mass-to-charge ratio values.

```
PeakList peaklist =
        new PeakListImpl.Builder(mzs).intensities(intensities).build();

PeakList bins =
        new BinnedPeakListImpl.Builder(peaklist).mzMin(700).mzMax(770)
                         .binWidth(10).build();
```
