## 1. Overview

## 2. MSLib Writers

Simple sptxt + msp writers.

## 3. MzXML Writer

A simple mzXML writer.

## 4. MzXML File Splitter (proposition)

We need to add methods to the writer to handle experimental infos and scan separately to split mzXML files.

- look at jrap to see how it is handling each scan data and how it is managing bytes and offsets in the file.
- parameters: scan filter(s), max #scan/file, max #bytes/file, ...
